Three measures focalized on:

- 1. Water connectivity**
- 2. Terrestrial connectivity**
- 3. Air connectivity**

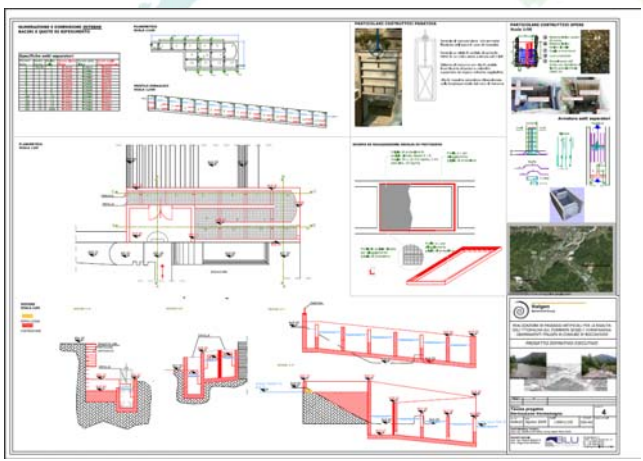

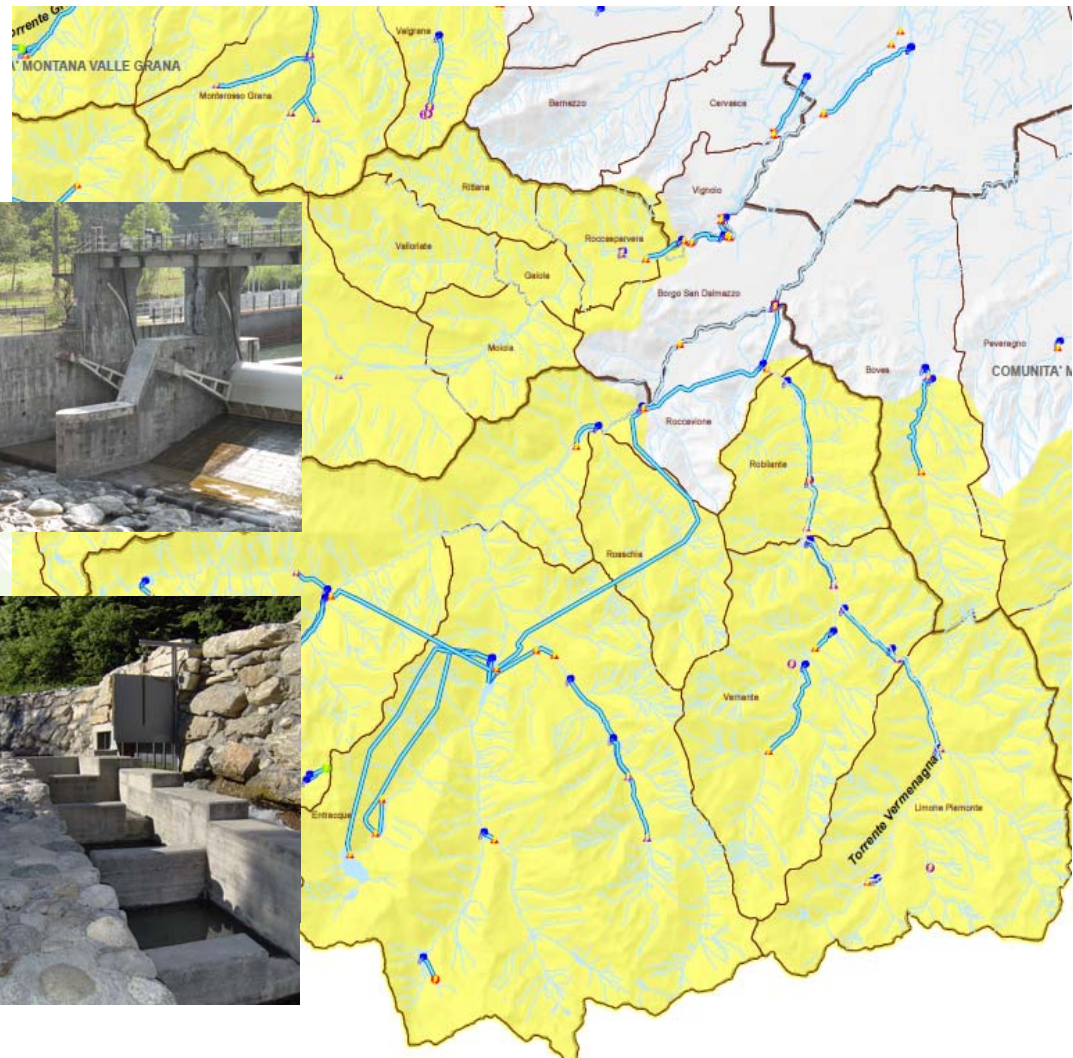

First measure concerning

Water connectivity

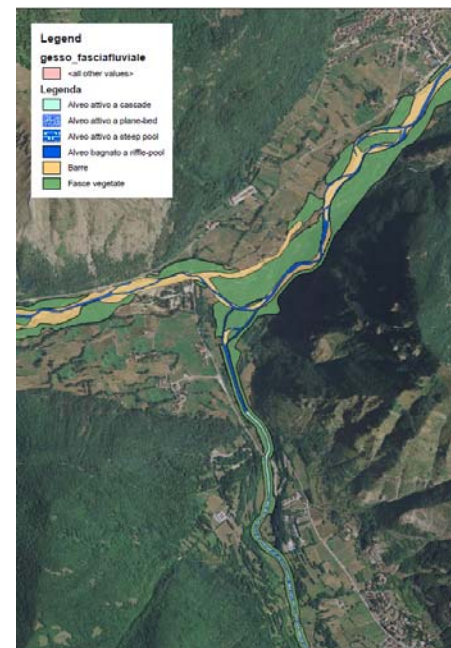

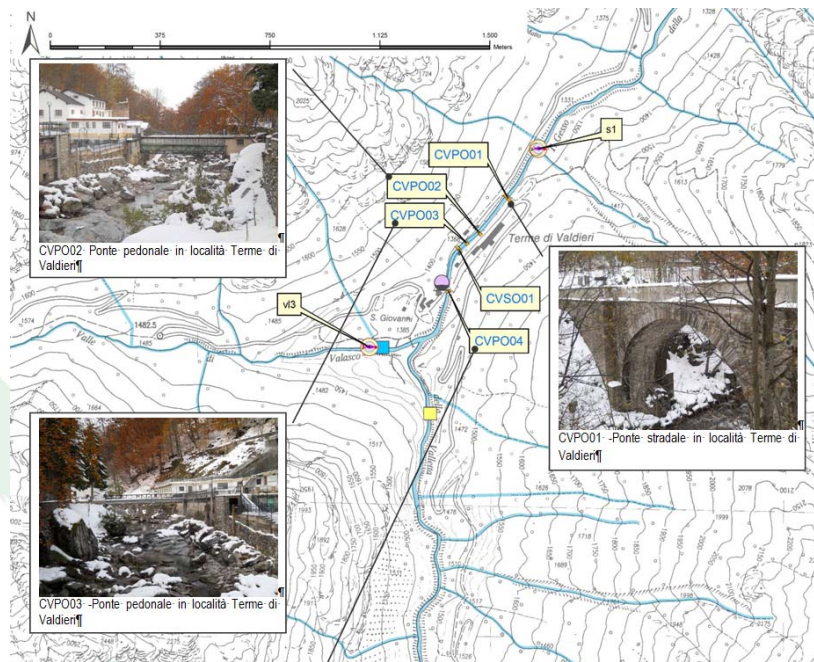

Fragmentation

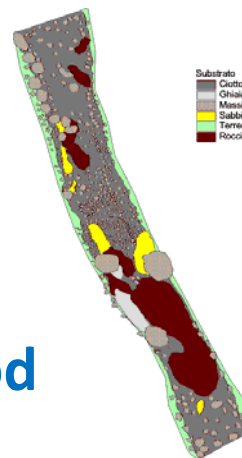

- Of water habitats due to artificial barriers (dams, bridges...)
- Of water habitats due to over withdrawal for energy, agricultural, human need
- Of water habitats due to artificialization of river's bodies

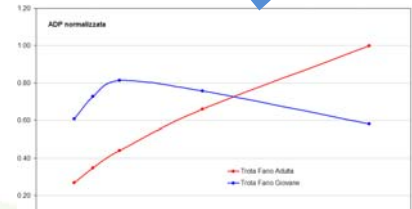

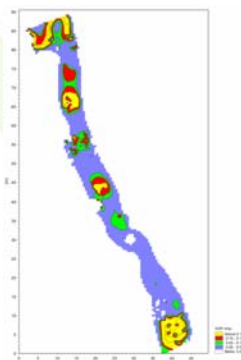

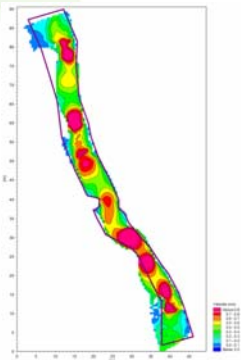

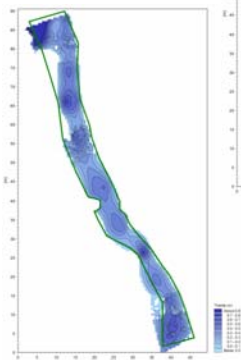

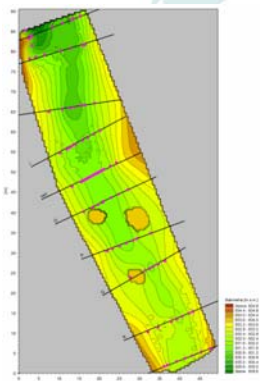

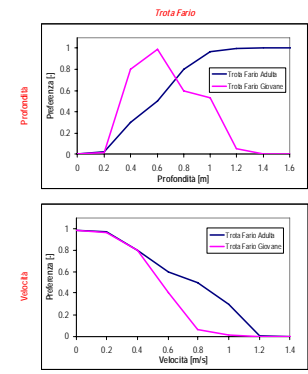

Research and Monitoring

Microhabitat Method

Minimum Vital Flow

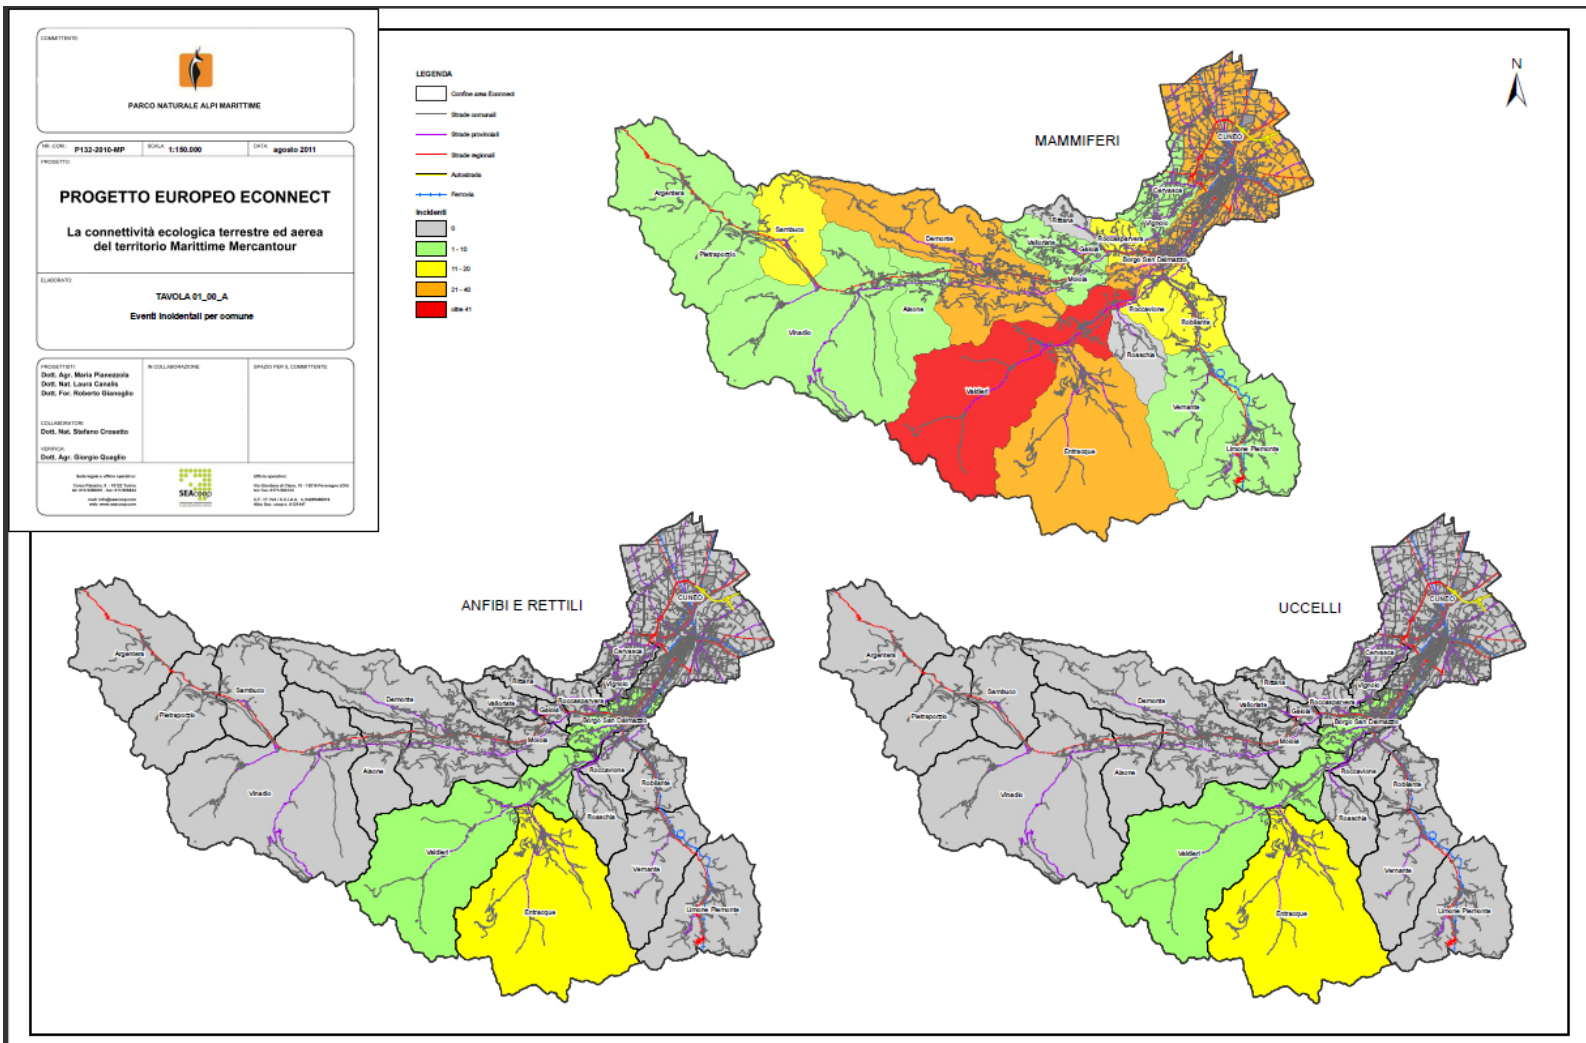

Second measure concerning

Terrestrial connectivity

Identify problems: Alteration...

- Of fauna's populations due to artificial barriers (roads, buildings, settlements)
